

Za Tower

A top-down comedic action RPG where a teleported stranger fights his way up the Tower

TDC GAME JAM

INFINIUM '26

IIITH

OVERVIEW

The player, [???], is a cool dude who was randomly teleported to the first floor of The Tower like many other people. These chosen heroes now have to clear the tower to save humanity. And to do that, they need to clear all 100 floors.

The Tower... What is it? Like in most manhwas (if you read them), they are basically inverted dungeons. Instead of going deeper, you climb up. Fight monsters, make friends, enemies and, obviously... save the world.

WHAT TO EXPECT FROM GAMEPLAY

It's a 2D RPG, top-down view game where you fight through the dungeons. Expect the combat to be fun, with quick dodging of enemy attacks while also managing the light within you. You might have to be creative with how you, as a player, fight. There is some world-building, so there is dialogue.

HOW THE GAME JAM THEMES MAP TO THE TOWER

The game jam consists of three primary themes integrated seamlessly into the design:

Comic

The comedy comes from the Tower itself: the floors are absurd. Expect enemies that break the rules of a 'serious' dungeon, over-the-top boss reactions, and comic-book flourishes like impact bursts and startled exclamation marks.

Twist

To protect the experience, we're keeping the Twist under wraps. What we can say is that it reshapes how players understand the Tower and what 'clearing it' really means. It's built into the game's structure, not tacked on at the end.

Light

Light represents the hope our hero carries, and it's the source of his power. It fuels his photon beams and other light-based abilities, and how he spends it shapes how every fight plays out.

CORE MECHANICS

- **Fantasy-based combat:** Action-packed top-down battle encounters requiring movement and timing.
- **RPG-esque elements:** Stat growth, light resource management, and character dialogue.
- **Fast-paced gameplay:** Short yet intense room-clearing mechanics designed for smooth flow.

TEAM DETAILS

All members are from **Vardhaman College of Engineering** (1st Year).

Name	Branch	Role	Email	IndieConnect ID
